msf6 auxiliary(scanner/telnet/telnet_version) > show options

Module options (auxiliary/scanner/telnet/telnet_version):

| Name     | Current Setting | Required | Description                                                                                                                                                                                         |
|----------|-----------------|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PASSWORD |                 | no       | The password for the specified username                                                                                                                                                             |
| RHOSTS   |                 | yes      | The target host(s), see <a href="https://docs.metasploit.com/docs/using-metasploit/basics/using-metasploit.html">https://docs.metasploit.com/docs/using-metasploit/basics/using-metasploit.html</a> |
| RPORT    | 23              | yes      | The target port (TCP)                                                                                                                                                                               |
| THREADS  | 1               | yes      | The number of concurrent threads (max one per host)                                                                                                                                                 |
| TIMEOUT  | 30              | yes      | Timeout for the Telnet probe                                                                                                                                                                        |
| USERNAME |                 | no       | The username to authenticate as                                                                                                                                                                     |
